

2026 AI Operations Market Brief

This brief summarizes a fictional internal analysis of AI operations tools. The main finding is that teams gain the most value when agents are connected to controlled tools, review checkpoints, and durable execution logs.

Metric	2025	2026 Forecast	Note
Agent task completion	58%	71%	Improved by better tool use
Human review rate	34%	29%	Lower but still required
Average task runtime	42 min	55 min	Longer workflows

Risk note: the spreadsheet from Finance uses a higher cost estimate than this brief. The final report should flag that conflict.
